

Check your knowledge

6 minutes

Answer the following questions to see what you've learned.

1. Which app would you use to create and manage copilots in Dataverse for Teams? *

☐ Power Automate for Teams

☐ Power Apps for Teams

☒ Microsoft Copilot Studio for Teams

✓ Create, edit, publish, and delete copilots with Microsoft Copilot Studio for Teams.

☐ Power copilots for Teams

2. You have a new copilot that you want your team to start using. Everyone on your team is already a member of the team that is associated with the copilot. How do you share the copilot so they can install it from the Built by your colleagues section in Teams? *

☐ Because the copilot is already associated with the team, you should provide the shared link for the copilot.

☒ Publish the copilot and then select Add to Teams when you're sharing the copilot by using Microsoft Copilot Studio for Teams.

✓ Adding to Teams will allow team members to install the copilot from the Built by your colleagues section in Teams.

☐ Add the team members to the security group that is associated with the copilot.

☐ Submit the copilot for admin approval after you publish the app in Microsoft Copilot Studio for Teams.

3. Which is a type of conversation node that doesn't exist? *

☐ Ask a Question

☐ Add a Condition

Make a Decision

✓ No such conversation node named Make a decision exists.
